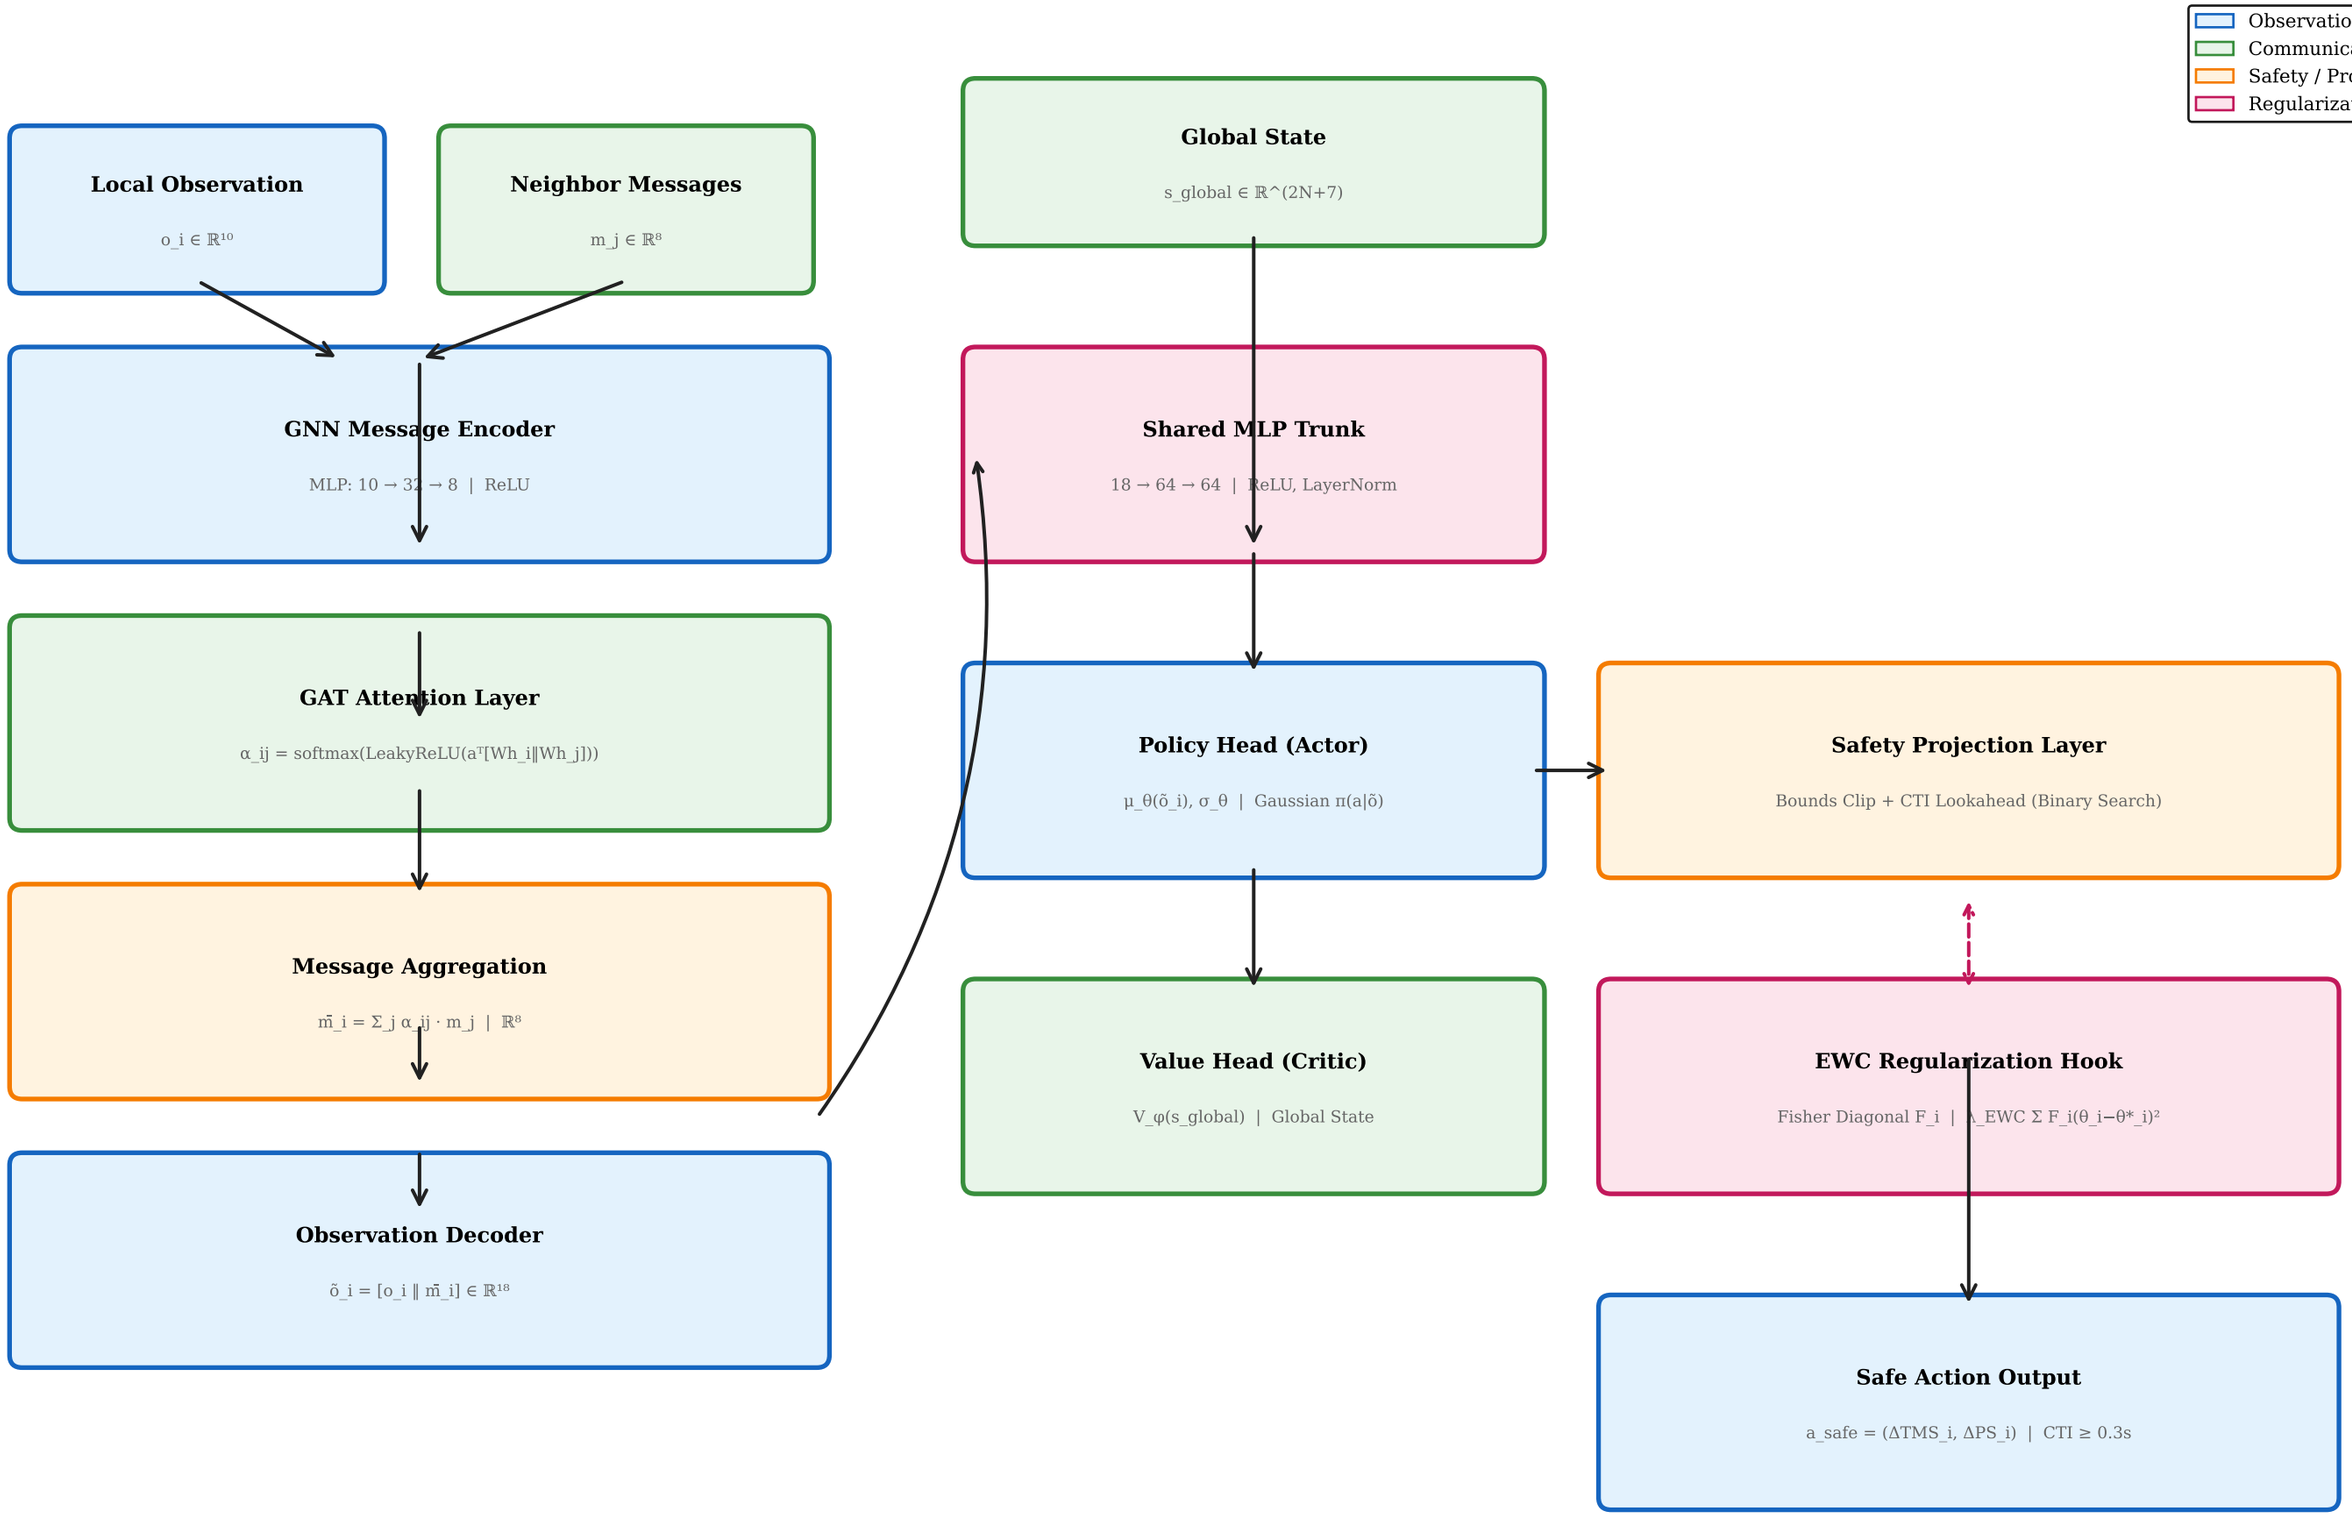
Figure 34: MAPPO-Safe-EWC Neural Network Architecture Detail



Parameter Counts:

Total per agent (shared, GNN+Actor): 6,284 params | Critic (centralized): 21,889 params

- GNN Encoder: 10×32 + 32×8 + biases(32+8) = 616 params
- Attention (a, W): 8×16 + 2×16 = 160 params
- Shared Trunk: 18×64 + 64×64 + biases(64+64) = 5,376 params
- Policy Head: 64×2 + bias(2) + log_std(2) = 132 params | Value Head (critic, centralized): 40×128 + 128×128 + 128×1 + biases = 21,889 params
