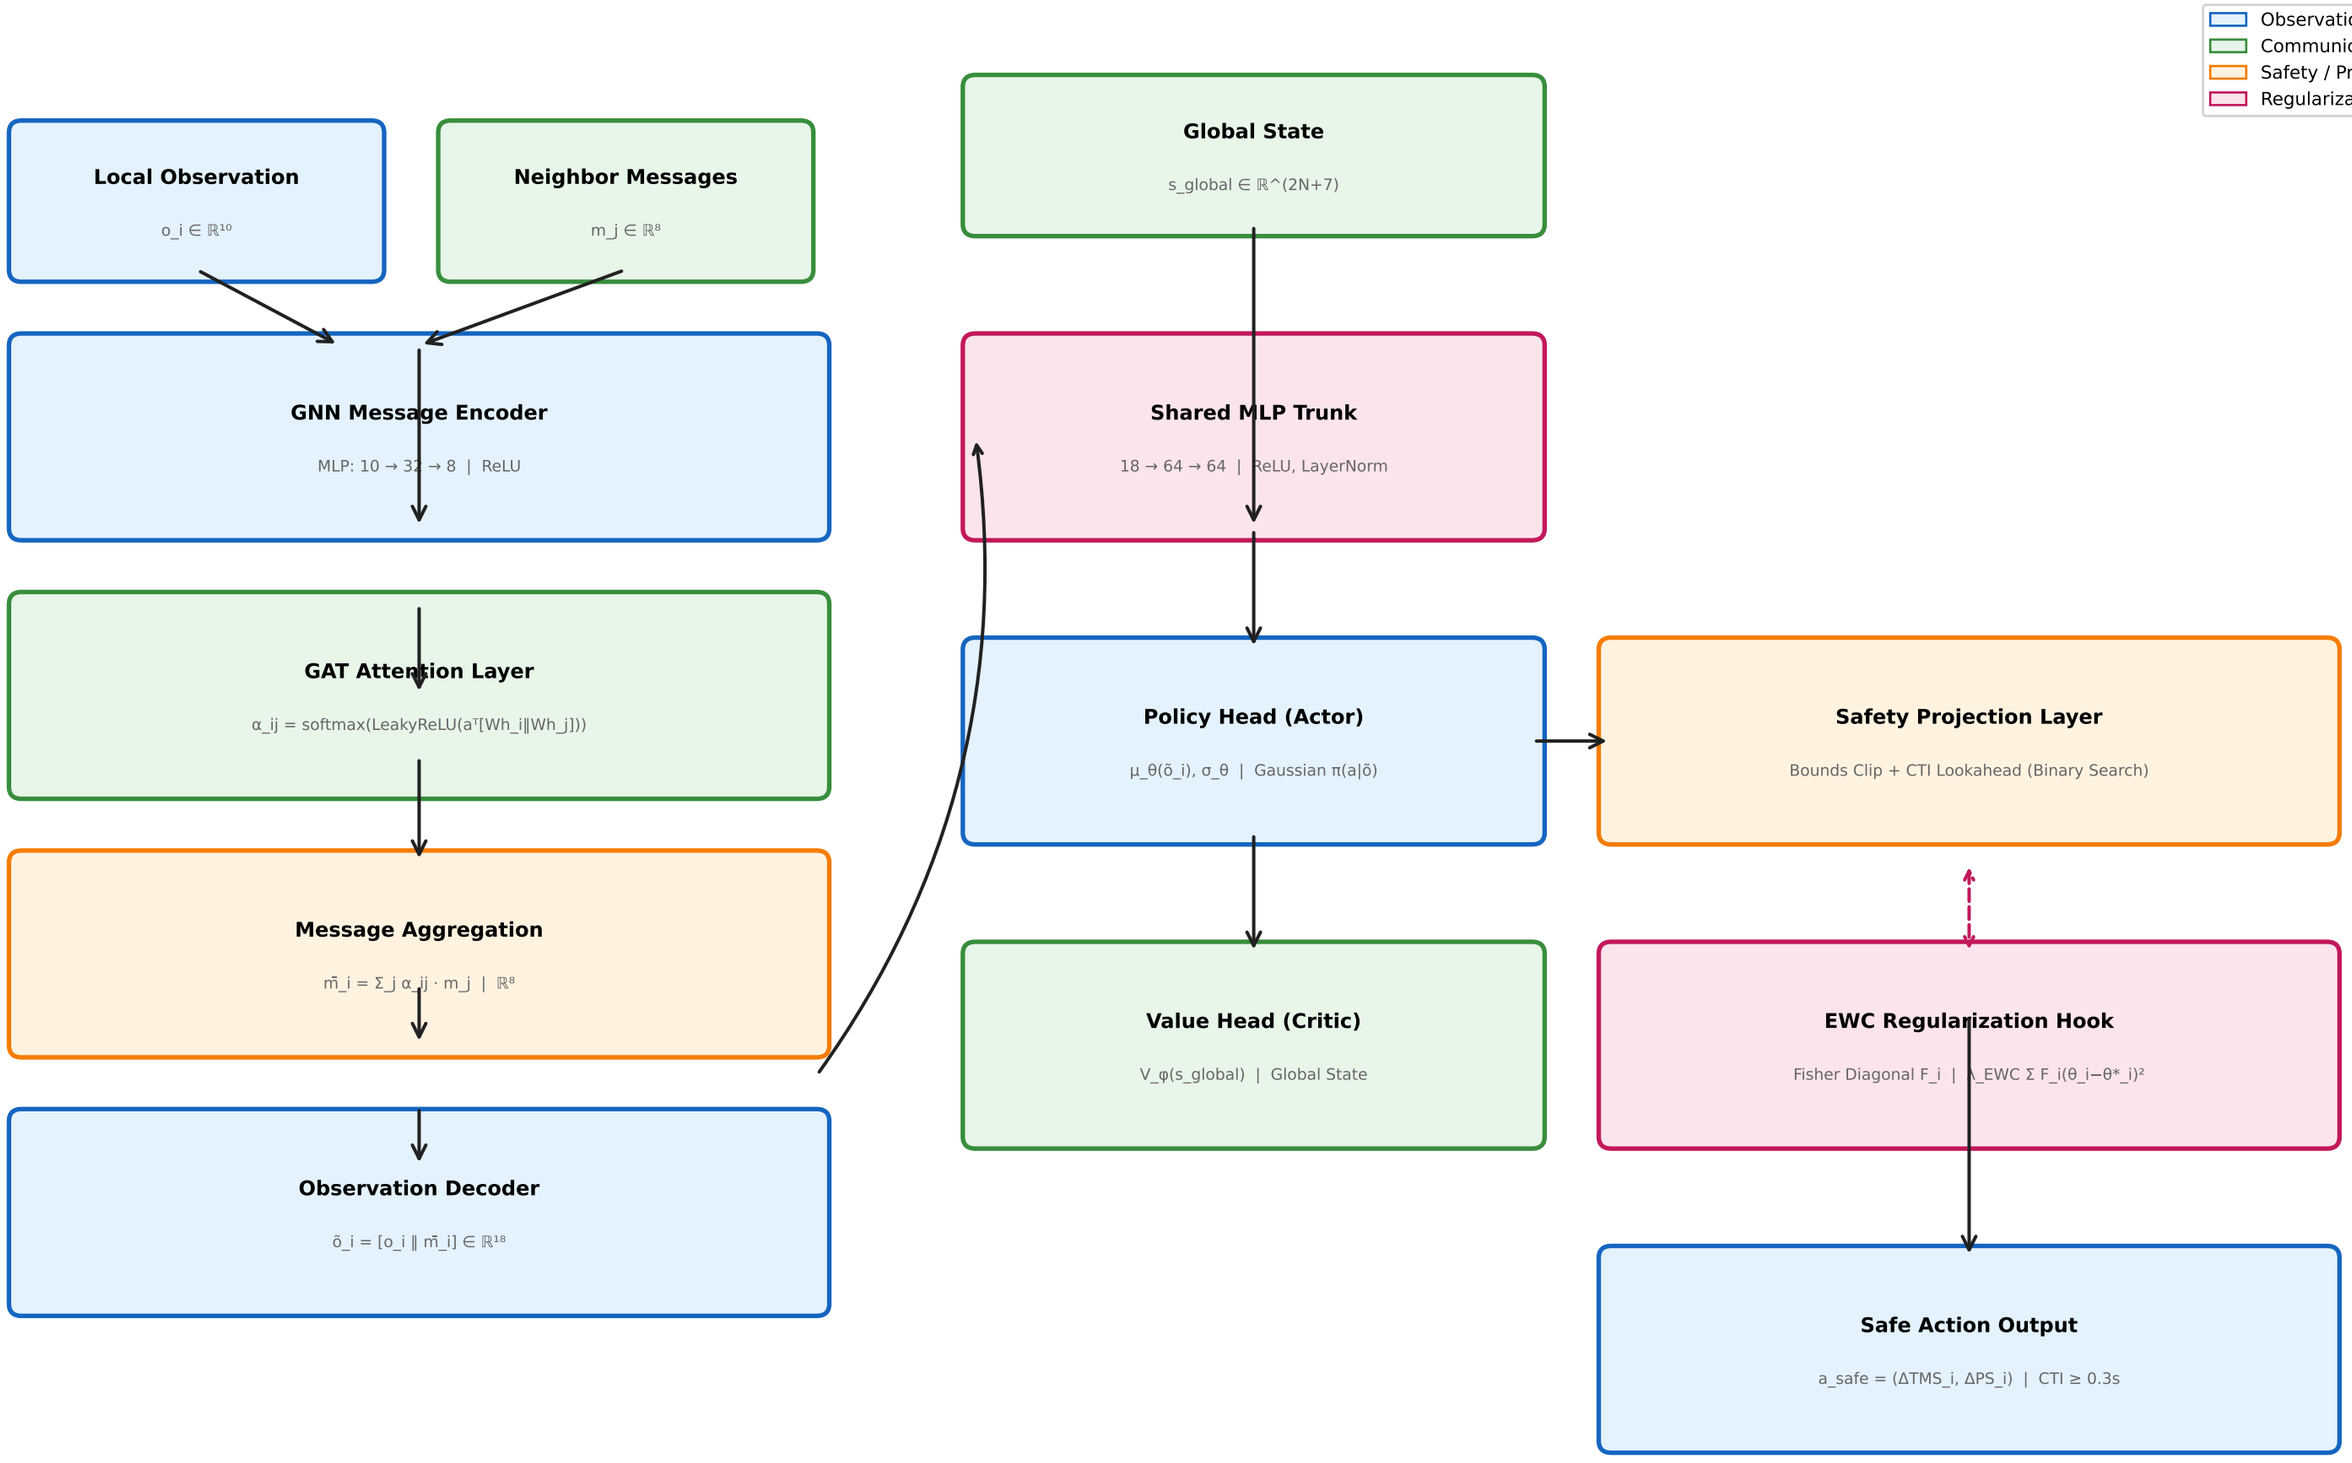
Figure 34: MAPPO-Safe-EWC Neural Network Architecture Detail



Parameter Counts:

- GNN Encoder: 10×32 + 32×8 + biases = 416 params
- Attention (a, W): 8×8 + 16 = 80 params
- Shared Trunk: 18×64 + 64×64 + biases = 5,952 params
- Policy Head: 64×4 + biases = 260 params | Value Head: 64×1 + biases = 65 params

Total per agent (shared): ~6,800 params | Memory: ~2.1 MB (FP32)
